

OVER 80 YEARS IN THE INDUSTRY

A grayscale photograph of a male worker in a factory. He is wearing a dark t-shirt, a baseball cap with a logo, a large headset, and work gloves. He is smiling and looking towards the camera. He is holding a long, cylindrical metal part in his right hand. In the foreground, there is a stainless steel metal part, possibly a box or a container, which he is working on. The background shows industrial machinery and equipment.

HOLMS ROSTFRIA AB

Your production partner for stainless sheet metal parts

ALWAYS WITH QUALITY IN FOCUS

We want to be your production partner for stainless sheet metal fabrication

Holms Rostfria has specialised in sheet metal fabrication since 1932 and has during the years gone over to focusing on more complex parts in stainless steel and aluminium.

Holms Rostfria is owned by key members of the staff, ensuring that we always have the best and most dedicated personnel who can handle even the most difficult tasks. Our priority is to meet your requirements and be a reliable partner in your production.

We find many of our customers in demanding industries such as the healthcare and food industries.

To meet these requirements, we value our most important asset: our employees. We prioritize their training, well-being and safety.

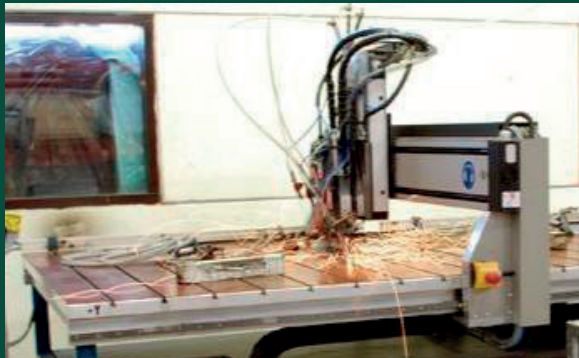

This is how we've been constantly been keeping our promise to offer efficient and high quality services to our customers.

Welcome to Holms Rostfria!

Thanks to our flexibility we can handle both small and large orders

We specialise in individual solutions adapted to the varying needs of our customers

We produce quality components with high precision and reliability of delivery

HOLMS ROSTFRIA AB

We supply finished components and structures with various surface treatments, including high polish finishes in our modern and efficient production facilities

We supply high-quality precision sheet metal components and handle all stages of fabrication - from prototype development to production, surface treatment and assembly

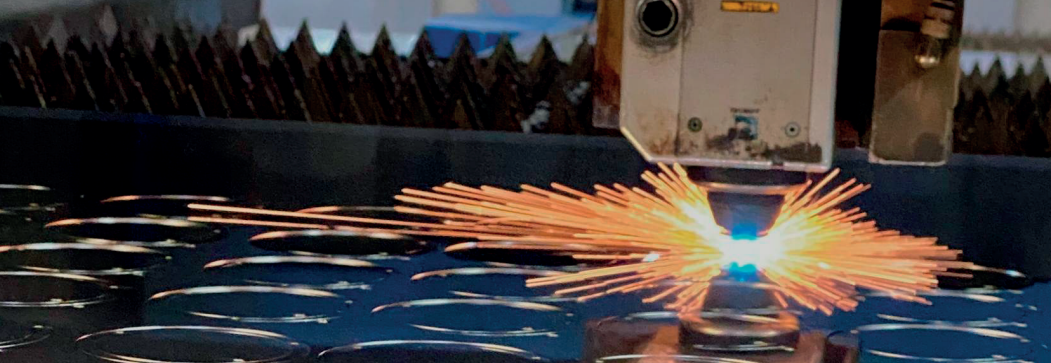

We offer:

- Manufacturing and construction advice for cost efficient production
- Production development and prototype manufacturing
- Sheet metal fabrication and assembly of complex parts in small to medium sized batches
- Ready to assemble kits
- Surface treatment through a network of highly qualified partner (lacquering, electric polishing, chromating, anodizing)
- Very fine polishing with RA values up to 0.05
- Products fulfilling Hygiene Demand requirements for the food industry
- Quality assurance - certified ISO 9001
- Traceability

...and last but not least, competent and flexible staff dedicated to your success

Materials:
Stainless steel
Aluminium
Steel

Dimensions:
Up to 8 mm thick
Up to 3 meter length/wid
